Education

2019 (on going) Secondary school

Triveny Public school

2021 High school-Management

Sagarmatha secondary school

2023 Bsc(hons) Computer 3 year

Informatic Pokhara

Technical Skills

- **Data Analysis**
- Python (Pandas, NumPy), SQL, Statistical Analysis
- **Visualization**
- Matplotlib, Seaborn, Power BI
- **Database**
- Oracle SQL, SQL Server, Data Modeling, 3NF
- **Tools**
- Jupyter, Excel, Git

Language

English

Nepali

About Me

IBSc (Hons) Computing student with strong expertise in data analysis, SQL, and data visualization. Proven ability to transform complex datasets into actionable insights through statistical analysis and compelling visualizations. Experienced with Python, Pandas, and SQL for data cleaning, modeling, and reporting. Passionate about leveraging data to drive business decisions and AI-powered enterprise transformation.

Work Experience

- **SEO Analyst Intern** | Fishtail Infosolutions | Jun 2025 – Oct 2025
- Tracked content performance using analytics tools
- Monitored impressions, CTR, and average position
- Mentored junior interns on analytics and content strategy

Projects

NYC 311 Data Analysis | Python, Pandas, Seaborn, SciPy

- Analyzed 300,000+ service requests to identify patterns in complaints
- Performed ANOVA ($F=514.18$) and Chi-Square ($\chi^2=1.64M$) tests
- Created bar charts, pie charts, and heatmaps to visualize insights
- Found Brooklyn (32.7%) and Queens (26.8%) have highest complaint volume

E-Classroom Database | Oracle SQL, SQL Developer

- Designed 3NF database with 13 interconnected tables
- Wrote complex SQL queries for student tracking and performance analysis

AI Movie Recommendation | Python, Scikit-learn, Pandas

- Built recommendation system using TF-IDF and cosine similarity
- Implemented K-Means clustering (optimal $K=5$)
